Safety, Environment and Quality

The safety and wellbeing of our team, customers and public is the highest priority and has a significant bearing on all our commercial dealings.

KNL are accredited for:

ISO 45001:2018 Occupational Health and Safety Management Systems

ISO 14001:2015 Environmental Management Systems

ISO 9001:2015 Quality Management Systems

Our Mission

Provide industry best practice to our customers and assist them to meet their goals and requirements beyond their expectations

To always provide quality workmanship and excellence in deliverables, whilst maintaining timely and efficient delivery on works, within budget

To be focused on continuous improvement across the board

To provide for and nurture a team of highly skilled and expertly trained professionals with similar values and outlook

We achieve this through the establishment of measurable objectives and targets; and by establishing a corporate culture that enables continual improvement and growth of our company

Why choose us

Specialised knowledge and expertise

We are one of the few companies to offer a comprehensive, end-to-end service for industrial pumps and rotating equipment: project management, fabrication, repairs, maintenance, service and sales across our entire scope of deliverables. KNL is WPCG Compliant and NMI Certified with specialised knowledge and expertise in our field.

Our centrally located, fully equipped workshop enables efficient in-house repairs and maintenance, while our team is structured to manage multiple projects simultaneously. With 'Site Ready' capabilities, we ensure prompt, professional service tailored to our clients' operational needs.

Who we work with

RioTinto

Gladstone Ports Corporation

Growth, prosperity, community.

- All welding processes
- Plant repairs
- Aluminium/Stainless welding
- Tanker discharge and bunkering
- Tank inspections/repairs/refurb
- Pipeline repairs/testing
- Facilities maintenance/repairs
- Painting and sandblasting

Installation & Commissioning

KNL has extensive experience with the installation and commissioning of mechanical process equipment. From the initial construction of a new plant, or replacing old for new, KNL can manage the project installation as well as provide technical support during the commissioning phase.

Reliability & Improvement

At KNL, we can provide specialist services for your mechanical process equipment to improve the service life of the equipment. Our team have a range of skills and experience on offer, so we can assist with reducing the cost of ownership, decreasing down time and increase the equipment mean time between failure.

Laser Shaft Alignments

During the assembly and installation of rotating equipment, multiple alignments may be required before the equipment is ready for operation as per OEM recommendations. Incorrect alignments can lead to shaft, bearing, coupling and mechanical seal failures. KNL can perform laser shaft alignments for process equipment manufacturers, installation contractors or industry end users to ensure the investment is best prepared for service.

Our Vision

To maintain quality of life of our personnel, valued clientele and the wider community through providing essential services, such as specialist pumping equipment, maintenance services and turn-key solutions

Fuel Bowser Service, Repair & Calibration

KNL Forecourt Installation division offers a broad range of services for Refueling Facilities which include, but are not limited to:

- Fuel pump installations and maintenance
- Construction works, forecourt enhancement and full maintenance
- Fuel bowser service, repairs and calibration
- Certification of Fuel meters
- UPP Welding
- Above and below ground Fuel storage tank installation
- Refurb accident damaged and out of service Fuel pumps

Welding & Fabrication

KNL have a fully equipped workshop and personnel available to perform the following welding applications to the highest standard:

- All welding processes
- All materials including all exotic materials.
- Pipe and heavy fabrication

All welding is performed to customer requirements and Australian procedures.

Painting & Sandblasting

In our purpose built paint bay we can provide abrasive sandblasting and the application of industrial and protective coatings for most requests.

Diesel Maintenance and Repairs

KNL specialises in diesel maintenance, offering a wide range of services including air conditioning and auto electrical repairs, servicing for trucks, trailers, and light vehicles (LV), as well as maintenance of elevated work platforms (EWP) and mobile plant. Our team is equipped to deliver efficient, high-quality solutions to keep your fleet and machinery running reliably.

AN EXPERIENCE FOCUSED ON YOU

We are all about helping our customers succeed.

At KNL Engineering and KNL Asset Maintenance, we work with you to solve the problems that present and find the right solutions to suit your requirements.

We deliver expert and timely technical advice that you can trust!

We offer an efficient and dependable service experience to all our clientele, big and small, across Australia.

At KNL, your experience as our customer matters.

Our problem-solving ability and technical expertise is best demonstrated by real-world examples.
